Issuer Credit Rating (ICR)

a
Excellent
Outlook: Stable
Action: Affirmed

Assessment Descriptors

Balance Sheet Strength	Strongest
Operating Performance	Adequate
Business Profile	Neutral
Enterprise Risk Management	Appropriate

Rating Rationale

Balance Sheet Strength: **Strongest**

- Strongest level of risk-adjusted capitalization, as measured by Best's Capital Adequacy Ratio (BCAR).
- Long-term history of organic surplus growth despite substantial policyholder dividends, which are a function of the RRG business model and commitment to its members.
- Conservative investment portfolio that primarily consists of high-quality fixed-income securities.

Operating Performance: **Adequate**

- Underwriting performance, prior to policyholder dividends, has been adequate and in-line with the medical professional liability (MPL) composite average.
- Investment performance has generated consistent income and moderate capital gains.
- Positive net income in each of the most recent five years.

Business Profile: **Neutral**

- Ophthalmic Mutual Insurance Company (a Risk Retention Group) (OMIC) is a Vermont-domiciled risk retention group that specializes in providing MPL insurance to ophthalmologists.
- The company maintains a dominant position in the US ophthalmic MPL market.
- Although concentrated in terms of specialty, the book of business is well diversified across the US.
- Long-tenured management team with significant depth of experience.

Enterprise Risk Management: **Appropriate**

- Risk management framework and capabilities are appropriate for the company's risk profile.
- Risks are identified in core areas: underwriting, claims, finance, and technology.
- Significant involvement by the board of directors.
- Disaster recovery plans are in place.

Outlook

- The stable outlooks reflect the expectation that OMIC will maintain its overall balance sheet strength assessment supported by risk-adjusted capitalization at the strongest level, including a stabilization in prior year reserves, while ongoing strategic initiatives implemented by management will maintain stable operating performance metrics that are in line with the company's adequate-assessed MPL peers.

Rating Drivers

- Negative rating movement may occur following further adverse reserve development on prior years, leading to a decline in the balance sheet strength assessment.
- Negative rating action may also occur if operating performance trends deteriorate and start to compare unfavorably to the industry and/or its medical professional liability peers.
- While unlikely in the near term, positive rating action may occur through a sustained period of producing operating results that outperform peers in the medical professional liability composite.

Credit Analysis

Balance Sheet Strength

OMIC's balance sheet strength primarily reflects its risk-adjusted capitalization at the strongest level, quality of invested assets, sound liquidity, and conservative reserving practices.

Balance Sheet Strength (Continued...)**Capitalization**

Risk-adjusted capitalization, as measured by Best's Capital Adequacy Ratio (BCAR), is at the strongest level. The capital position reflects OMIC's conservative underwriting leverage, loss reserve development trends, and below average investment leverage. Underwriting leverage measures declined during the prior five-year period and remain below those of the MPL composite. This is primarily due to surplus growth, a decrease in loss reserves, and relatively stable premium levels. Surplus grew considerably during the period, despite policyholder dividends, primarily driven by underwriting and investment income.

The company paid annual policyholder dividends in each of the prior five years, which have averaged approximately 10% of net premiums earned. In addition to dividends, OMIC issued partial returns of contributed surplus to policyholders that have left due to death, disability or retirement. The company advises the Vermont Department of Financial Regulation each year that a partial surplus return is anticipated.

OMIC maintains sound balance sheet liquidity as non-affiliated invested assets exceed overall liabilities. In addition, the current, quick and overall liquidity ratios compare favorably to the peer group composite. Furthermore, 78% of invested assets were in highly liquid bonds, short-term investments and cash as of December 31, 2023. Liquidity has been enhanced by the generation of positive operating cash flows in each of the last five years, despite the payment of significant policyholder dividends during the period.

Asset Liability Management - Investments

OMIC places the bulk of its invested assets in fixed-income instruments, largely in both taxable and tax-exempt municipal bonds, corporate bonds and, to a lesser extent, US government and mortgage backed securities. The municipal bond portfolio is diversified across two thirds of all states and is composed of both revenue-backed and general obligation issues. The remaining invested assets consist of cash and common stocks. Common stock leverage remains at an acceptable level and well below the average of the medical professional liability composite.

Reserve Adequacy

Reserves are evaluated on an annual basis by an independent actuarial consultant, with quarterly true-ups. As of year end 2023, net reserves of \$89.1 million are carried at the midpoint of the independent actuary's reasonable range of estimates. Reserve development has been mixed with strengthening in six of the past nine calendar years, through 2023. From an accident year perspective, development has generally been favorable although AY 2018 has seen a 23.3% increase from original estimates and AY 2022 has experienced a more modest 1.9% increase. In 2023, OMIC reported a small amount of adverse development. Estimated ultimates were consistent with the independent actuary's prior analysis.

Operating Performance

Premium growth has been solid in recent years. Growth has come through broadening its market position and geographic footprint, with the company going from writing more than \$1 million of direct premium in 11 states as of year end 2018 to 21 states at year end 2023. In addition, OMIC has developed relationships with private equity (PE) organizations that have acquired ophthalmologist groups in recent years. Premium collected from PE groups in 2022 was approximately 20% of the book.

Underwriting performance over the most recent five year period has been adequate. OMIC's five year average combined ratio before policyholder dividends is close in-line with the MPL composite average. The company's loss ratio compares favorably while the underwriting expense ratio lags. The elevated expense ratio reflects higher costs associated with writing business across the US and the lower premiums charged for ophthalmologists compared to other physicians and surgeons. Policyholder dividends have been consistently paid on an annual basis, averaging 8.8 points on the combined ratio.

Investment performance has been solid and is the primary source of pretax earnings over the period. OMIC has consistently generated \$8.4 - 9.8 million of income in each of the most recent five years. Cumulative investment income of \$44 million has more than offset \$29.7 million of cumulative post-dividend underwriting losses. In 2023, OMIC reported \$9.8 million of net investment income, the highest of the period. Yield and total return on invested assets compare favorably to the composite average. Realized capital gains have typically been modest, although gains of \$2.9 million and \$1.4 million were reported in 2020 and 2021, respectively. Unrealized gains and losses have fluctuated alongside market conditions, but have typically been favorable with 2018 and 2022 being the exceptions. In 2023, investment market conditions were favorable with a +\$7.5 million change in unrealized gains and losses reported.

Pretax earnings have been generated in four of the most recent five years. The exception is 2020 due to the magnitude of underwriting loss exceeding investment and other income, resulting in a pretax loss of \$1.4 million. Cumulatively, OMIC generated \$19.2 million of pretax earnings over the five year period. Net income has been consistently positive, with the 2020 pretax loss being

Operating Performance (Continued...)

more than offset by realized gains. In 2023, the company reported solid results with pretax earnings of \$5 million and net income of \$4.2 million. AM Best's expectations are for similar results in 2024.

Business Profile

OMIC specializes in underwriting professional liability insurance for ophthalmologists throughout the United States. Its mission is to protect American Academy of Ophthalmology (AAO) members, eye care entities, and patients by providing comprehensive, affordable liability insurance and best-in-class risk management and claims defense services. OMIC's vision is to remain the sole long-term market leader by continuously anticipating the needs of eye care professionals and providing them with unique and innovative solutions. The company is licensed in Vermont and operates in other states under the authority of the Liability Risk Retention Act of 1986. Insured ophthalmologists are required to be members of the sponsoring organization, the AAO.

Coverage is marketed to individual practitioners, group practices, and networks. OMIC offers coverage to ophthalmologists, employed optometrists and nurse anesthetists, and professional entities, including eye banks and surgery centers. The vast majority of business is produced on a direct basis.

All policies are issued on non-assessable, claims-made forms. Typical limits are \$1.0 million per claim and \$3.0 million in the aggregate; however, limits up to \$5.0 million per claim and \$10.0 million in the aggregate are offered. The company also provides tail coverage to qualified insureds upon death, disability, or retirement. Extended reporting period coverage is also offered to insureds upon termination.

The professional liability policy includes \$25,000 in defense coverage for disciplinary proceedings. There are an additional sixteen benefits covered under a single \$100,000 limit, which is 100% reinsured. Reimbursement coverage is provided for seven regulatory proceedings under the Broad Regulatory Protection (BPR) provision. Billing errors investigations and violations of the HIPAA privacy and security regulations are covered under this benefit as well as EMTALA, DEA, STARK Act, covered licensure, and peer review actions. The policy also includes nine Cyber Liability (e-MD®™) coverages that address multimedia liability; security and privacy liability and breach response costs; security and privacy regulatory defense and penalties; network asset protection; cyber extortion; non-compliance with PCISS; and cyber terrorism.

OMIC is operated by a staff of insurance professionals at its main administrative offices in San Francisco, headed by the president and chief executive officer, Bill Fleming. A small home office in Burlington, Vermont, is maintained through Strategic Risk Solutions.

Enterprise Risk Management

OMIC has implemented an enterprise risk management (ERM) identification process with emphasis on the core areas of its operations. The impact of the identified risks is evaluated by the board of directors. The risk management framework includes interaction between committees, operational departments, and the company's centralized decision makers. Excess capital is available to provide for increased capacity in the future and/or when a hard market develops, exhibiting attention to cycle management. Management is very seasoned and has been consistent at OMIC for over 10 years. Disaster recovery plans are in place and data is backed up at an off-site location.

Examples of critical identified risks include a single \$15 million loss, stock/bond market crash, ransomware and loss of business to private equity groups. OMIC has developed mitigation plans to address each one of these key risk factors, accordingly.

Reinsurance Summary

OMIC maintains excess of loss reinsurance that provides coverage for losses up to \$5 million per occurrence subject to a retention of \$1 million. A clash cover provides additional protection of \$5 million in excess of \$5 million. The company also maintains an Awards Made cover (95% placed) which provides coverage up to \$5 million per occurrence and includes protection for prior years. The first layer of \$4 million in excess of \$1.0 million is flat rated. The principal reinsurance providers are Lloyd's of London syndicates, TransRe, and Hannover Re.

Environmental, Social & Governance

AM Best views the main ESG risks to OMIC to be governance and social inflation. Governance includes all decision-making matters, such as policy setting, underwriting, reserving, risk mitigation, claims management, setting corporate strategy, and hiring practices, as well as establishing risk tolerances and risk appetites that are appropriate for the company and its stakeholders. Assessment of good

Enterprise Risk Management (Continued...)

corporate governance depends on how well management and the board at OMIC execute on these matters. At this point, governance at OMIC has been appropriate.

Social inflation in the US, as defined by AM Best, is the rise in current or future claims caused by higher court awards and legislated increases in claims payments driven by societal behavior, including changes in demographics, litigation financing, a perceived decay in the public trust of corporations, and changes in tort reform. As a medical professional liability insurer, social inflation could present some challenges in the future.

OMIC's exposure to material environmental risks is considered to be low.

History

OMIC was incorporated under the laws of Colorado on August 27, 1987, as a mutual insurer. It was organized under the Federal Liability Risk Retention Act of 1986 and commenced operations on September 30, 1987. On January 1, 1994, the company was re-domesticated under the captive insurance laws of Vermont as a mutual insurer and risk retention group.

Prior to November 1, 1992, each policyholder upon acceptance by OMIC was required to make a surplus contribution. The amounts of the surplus contributions were determined by the type of policy issued and were equal to 80 percent to 100 percent of the annual mature claims-made premium. Beginning in 1994, the company has returned contributions based on its operating performance and financial condition. At December 31, 2021, Paid-in Surplus of approximately \$63,000 remains and is refundable at the discretion of the company. The company continues to search for the last few remaining original members and return this paid-in capital.

In 2002, the OMIC Board of Directors made modifications to the company's bylaws. This was prompted in anticipation of marketing to and writing major group accounts that operate as part of an academic teaching program in ophthalmology and/or are situated within a health care entity primarily dedicated to providing ophthalmic care and treatment. Additionally, the amended bylaws authorize coverage to non-ophthalmologists who are an integral part of providing medical services exclusively to ophthalmology patients at the facility.

A Best's Financial Strength Rating opinion addresses the relative ability of an insurer to meet its ongoing insurance obligations. The ratings are not assigned to specific insurance policies or contracts and do not address any other risk, including, but not limited to, an insurer's claims-payment policies or procedures; the ability of the insurer to dispute or deny claims payment on grounds of misrepresentation or fraud; or any specific liability contractually borne by the policy or contract holder. A Financial Strength Rating is not a recommendation to purchase, hold or terminate any insurance policy, contract or any other financial obligation issued by an insurer, nor does it address the suitability of any particular policy or contract for a specific purpose or purchaser.

A Best's Issue/Issuer Credit Rating is an opinion regarding the relative future credit risk of an entity, a credit commitment or a debt or debt-like security.

Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. These credit ratings do not address any other risk, including but not limited to liquidity risk, market value risk or price volatility of rated securities. The rating is not a recommendation to buy, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor does it address the suitability of any particular financial obligation for a specific purpose or purchaser.
